Rising Trends in Home Construction for Summertime

Outdoor Kitchens and Cabanas

Got a backyard? Outdoor kitchens are the perfect home addition for enjoying the outdoors with friends and family. Nothing makes the warmer months better than an outdoor kitchen! Popular features include grills, stoves, refrigerators, fireplaces, sinks, flat screen TV's, ice makers, granite counter tops and ceiling fans, just to name a few ideas. If you are thinking about an outdoor kitchen of your own, we can help with design, material selection, and more.

Theater Rooms

Now becoming more common in today's homes, theater rooms give a movie theater experience right at home. Special features include large HD screens, audiophile quality sound systems, room darkening curtains, luxurious seating and accent lighting. We work closely with the professionals at Epic Audio and Visual to build high-end theater rooms. Whether you want to build an addition or save money by converting an existing room, there's no better way to watch a great movie or a ball game than in the comfort of your own theater room!

Be On the Lookout!

Recent tornadoes and hail storms prompt us to caution you: avoid out of state storm chasing contractors! After all, how would you get them back in a month for warranty work if your roof was leaking? They'll be on the east coast chasing the latest storm by then! We all agree it makes sense to keep our money in our local economy and "Buy Oklahoman."

And Speaking of Storms...

United Construction is pleased to announce we are now one of the most highly recommended contractors in the state. In addition to being a recommended contractor for Shelter Insurance and Travelers Insurance, we're now a preferred vendor for All State Insurance. We've also recently been selected to join Crawford Contractor Connection, a third party who assigns contractors for the repair of insured losses for a large number of smaller insurance companies who do business in Oklahoma.

Bathroom Remodels Made Easy

Bathroom remodels can be a pain. You're often down a working bathroom for a month or two, and much of that time is spent waiting on supplies like tile or counter tops.

United has come up with the solution! We have put together three standardized bathroom remodel packages for hall and guest bathrooms. These include our most popular selections and use standardized bathroom remodel supplies which are very quick and easy to acquire. That way, construction can begin quickly and go smoothly.

Of course, we know budgets are tight, so we've balanced out style and function with savings.

Package options include:

Silver \$ 8,500.00

Gold \$10,500.00

Platinum is \$12,500.00

Call Mike or Aaron for more details!

A Word of Thanks

We appreciate that many of you who we have done work for enthusiastically refer us to your friends and family. In turn, we have provided them with quality workmanship and friendly service. For your good will and confidence in United Construction we would like to sincerely say "Thank You". We appreciate the future referrals you'll send our way, and we want you to know we'll always give our best.

High Tech?

If you would prefer to receive the United Quarterly via email in the future, just drop a note to Jeanette at Jeanette@UnitedCandR.com We promise we will only email you our newsletter.

Prefab bathrooms don't have to be boring! With United, we can create the bathroom of your dreams without burning a hole in your pocket.

Our Partners

We'd like to give a tip of our hat to a few other companies in Oklahoma. These are businesses we work with regularly because they share our standards of high quality and excellent service.

Certified kitchen designers offering Wood-Mode and Brookhaven cabinetry.

For high quality plumbing fixtures and supplies that fit with any design scheme.

A roofing and siding supplier with a wide variety of quality materials.

Provider of quality windows and doors and excellent customer service.

A family owned company providing all types of concrete work.

All the best,

Mike Gipson
